Honors-Awards

ACM college chapter
Bronze in Hackerrank week of code 26
First Prize in Debugging Contest [Techutopia 2017]
Bronze in week of code 28
Bronze in Hackerrank week of code 30

Prince Sinha

Senior Director of Innovations & AI @ Cyble Inc. | AI Architect | Full Stack Developer
Bengaluru, Karnataka, India

Summary

As a Director of Engineering, and member of CTO Office at Cyble Inc., a cybersecurity company that helps organizations protect themselves from cyber threats, I lead a team of talented engineers who deliver high-quality products on time and within budget. I have over 7 years of experience in backend engineering, data engineering, and microservices architecture, and I have built a strong engineering culture that fosters continuous learning, innovation, and collaboration among team members and across functions.

Some of my notable achievements include setting up automated unit tests, infra and application monitoring, performance and usage metrics, a central caching layer, a vulnerability notification system, an internal developer platform, and an IAM service. These solutions have improved the efficiency, reliability, scalability, and security of the platform, as well as the customer experience and satisfaction. I hold an Engineer's Degree in Computer Science from the University of Engineering and Management, Jaipur. I am proficient in Git, MySQL, and XML, and have won multiple awards and honors in coding and debugging contests.

I am passionate about cybersecurity and data engineering, and I enjoy solving complex problems and creating innovative solutions that make a positive impact. I am always eager to learn new skills and technologies, and to share my knowledge and expertise with others. I am looking for a new challenge and an opportunity to work with a dynamic and diverse team that shares my vision and values.

Experience

Cyble

4 years 11 months

Senior Director of Innovations
June 2025 - Present (1 year)

Leading the innovation strategy at the intersection of AI, cybersecurity, and automation to build the next-generation ecosystem of intelligent, ambient and autonomous cybersecurity agents.

Director of Engineering

April 2024 - July 2025 (1 year 4 months)

Bengaluru, Karnataka, India

Engineering Manager

May 2022 - April 2024 (2 years)

Remote

Engineering Lead

March 2022 - May 2022 (3 months)

Remote

Setup automated unit tests using bitbucket pipelines to ensure code quality

Set up infra and application monitoring, performance, and usage metrics

across all applications using Newrelic, and Opentelemetry.

Developed a central caching layer, to cache third-party API calls and saved at least 100K API calls per month.

Built a vulnerability notification system that is able to process 5 million messages/hour, generating notifications at about 10000/sec at peak

Created an internal developer platform for developers with CI/CD, auto-deployment, debugging, and log viewer functionalities using Kubernetes

Built an IAM service for central authentication and authorization

Software Engineer

July 2021 - March 2022 (9 months)

Bengaluru, Karnataka, India

Postman

Senior Software Engineer

May 2020 - July 2021 (1 year 3 months)

Bengaluru, Karnataka

Pick My Solar

Full-stack Developer

November 2018 - April 2020 (1 year 6 months)

Hyderabad

Built a microservice in Laravel

Implemented Level 1 and Level 2 caching to reduce response times

Solar.com

Full-stack Developer

November 2018 - April 2020 (1 year 6 months)

India

Designing scalable architecture for the future of Solar.

Designed architecture and reduced response time from 5000ms to 250ms for a number of existing APIs.

Lead a team to follow TDD for microservice development.

UrbanHands (Faviona Technologies Private Limited)

Founder

January 2016 - November 2018 (2 years 11 months)

India

Freelance Web Developer / Designer

Owner

October 2016 - May 2017 (8 months)

->Designing the templates initially on photoshop

->Turning the design to HTML and CSS

->Writing back-end code ,if needed

Education

University of engineering and management, jaipur

Engineer's Degree, Computer Science · (2014 - June 2018)

Free Code Camp

Full Stack Web Developer, Computer Software Engineering · (2016 - 2016)

St. Vincent's High and Technical School,Asansol

Matriculation, Higher Education/Higher Education

Administration · (2000 - 2011)
